Subject Index

CHINESE ASTRONOMY & ASTROPHYSICS VOL. 12 (1988)

SUBJECT INDEX

Observational Cosmology

Cosmic strings and the two-point galaxy-galaxy correlation
function / Jing & Zhang 159

Cosmic strings: large-scale mass fluctuations and velocity
fields / Jing & Zhang 179

Fractal structure in the large-scale distribution of
galaxies / Wen, Deng et al. 269

A two-component model for the large-scale structure of
the universe / Gao 276

The spatial correlation function of cD Abell clusters /
Gao & Zhou 279

Theoretical Cosmology

Plane gravitational waves under a non-zero cosmological
constant / Lu 186

New insights into Olbers' and Seeliger's paradoxes and
the cosmic background radiation / Pan 191

Quasars. Active Galactic Nuclei. BL Lac Objects

Identification of heavy element absorption systems in
QSO 2000-330 / Cui & Chen 13

Optical Behaviour of four BL Lac objects / Xie, Hao et al. 197

The masses of twenty-eight active galactic nuclei / Liu 205

Radio Sources

Image analysis of the observations of the DA240 region
with the Miyun radio telescope / Wei & Qian 70

A 232 MHz survey of an area centered on DA240 / Qian & Wei 87

Peculiarities of 3C 454.3 as a superluminal source / Wu 283

Galaxies

Infrared properties of dusty elliptical galaxies / Hu & Wang 110

Supernovae. SN Remnants. Neutron Stars

Early neutron stars and quark matter / Li, Kong et al. 1

An X-ray investigation of Crab-like supernova remnants /
Wang & Seward 212

Research on neutrino events of SN 1987A / Zhao, Zhao et al. 294

Star Clusters

The virial mass of the open cluster M 11 / Zhao & He 7

| | |
|--|-----|
| Infrared Sources | |
| A search for infrared objects in Vela / Xiao & Li | 304 |
| Binary Stars | |
| Estimating evolutionary stage of contact binaries / Liu | 43 |
| Four-colour uvby photometry of the near-contact semi-detached system TX Cassiopeiae / Zhai, Zhang et al. | 60 |
| Spectroscopic orbits of eclipsing binaries: AA UMa / Lu | 99 |
| Roche model analysis of the eclipsing binaries ST Carinae and RY Indi / Zhai, Chen & Li | 106 |
| Speckle interferometry observations of three binaries / Wang, Qiu et al. | 141 |
| Photometric analysis of DO Cassiopeiae / Liu, Zhang & Zhang | 216 |
| A combined solution of the light curve and velocity curve of U Pegasi / Zhai & Lu | 223 |
| A spectroscopic orbit for Theta Draconis from photoelectric radial velocities / Lu, Shen & Jiang | 228 |
| Photometric study of the eclipsing binary IU Aurigae / Liu, Leung & Tan | 298 |
| Stellar Structure | |
| Stability of stellar structure in non-equilibrium thermodynamics / Wang | 164 |
| Solar Observations | |
| The loop prominence of 1984 February 18 and its velocity field / Gu & Li | 19 |
| A statistical analysis of solar H-alpha spicules / Du & Nakagomi | 136 |
| Radio observation at 8.2 cm of the total solar eclipse of 1980 February 16 / Ji, Yang & Liu | 152 |
| Intra-network flux concentrations / Wang & Shi | 241 |
| Solar Physics | |
| A solar continuum model / Jin | 129 |
| Continuum of white-light flares and model atmospheres / Gan & Fang | 146 |
| Solar narrowband decimetric spike bursts and associated phenomena / Li, Qin & Wang | 232 |
| Heating of coronal arcade by a slow motion of its footpoints / Peng & Wu | 311 |
| Material exchange as heat engine for the corona-chromosphere transition region / Ni, Fang et al. | 320 |

| | |
|--|-----|
| Plasma physics | |
| Ray direction in a warm electron magnetized plasma / Wang | 79 |
| Comet Halley | |
| Radio observations of the OH line in Comet Halley / Luo, Zhou et al. | 324 |
| Photographic photometry of the CN and C ₃ comae of Comet Halley / Hu, Shen & Chen | 328 |
| Planets | |
| The precession and long-term nutation of Venus / Zhang | 38 |
| The Earth | |
| A damped oscillator model of the 50-day oscillation in the length of day / Li & Wilson | 48 |
| Polar motion caused by variation in air mass distribution / Gao | 55 |
| Short-period fluctuation analysis of the BIH LOD series / Ding, Xiao & Xia | 334 |
| Earth's Satellites. Celestial Mechanics | |
| Atmospheric tidal perturbation of artificial satellite orbits / Huang & He | 34 |
| On several problems in the numerical integration of celestial orbits / Liu & Liao | 26 |
| A practical intermediate orbit for artificial satellites / Cui | 114 |
| Reduction Techniques | |
| A new model of predicting sunspot number / Zhang | 249 |
| An improvement of the plate constant method in the determination of stellar parallaxes / Zhao | 254 |
| Historical Astronomy | |
| Secular acceleration of Earth's rotation from Chinese records of lunar occultation of stars before 600 AD / Liu | 169 |
| The secular variation of Earth's rotation obtained from 171 Chinese records of lunar occultation before 600 AD / Liu | 260 |

EDITORIAL ANNOUNCEMENT

A General Index to CHINESE ASTRONOMY & ASTROPHYSICS Volumes 1-12 (1977-1988), consisting of Subject Index, Author Index and Source Indices will be issued together with our next number, Vol.13, No.1, March 1989.
